Klaci II, RT.001/RW.010, Klaci III, Margoluwih, Kec. Seyegan, Kabupaten Sleman, Daerah Istimewa Yogyakarta 55561

A fresh graduate in Informatics from Universitas Atma Jaya Yogyakarta with experience building full-stack web applications, backend APIs, and testing system performance. I have worked with TypeScript, Next.js, Node.js, Express.js, Prisma, and SQL databases, as well as deploying applications on AWS Lightsail.

I'm particularly interested in software engineering, especially backend development, APIs, and system performance. I enjoy learning new technologies and adapting to different tools depending on the needs of a project. Besides my main stack, I've also explored Python and Go while maintaining a working familiarity with Java.

Work Experiences

STT Diakonos - Pajerukan, Kaliori, Kalibagor, Banyumas Regency, Central Java (Hybrid)

Jan 2026 - Mar 2026

SIAKAD Development — Practical Work Project

STT Diakonos Banyumas was established on October 21, 2002, in response to the need for an ecumenical theological education institution in the Banyumas region. The institution was founded to provide theological and Christian Education programs and to equip students, teachers, and church workers with academic and practical skills. Since its establishment, STT Diakonos Banyumas has continued to develop as a higher education institution focused on preparing graduates for ministry, education, counseling, and other professional roles.

- Developed and delivered a web-based Academic Information System (SIAKAD) for the school.
- Handed over the completed system and provided technical support for the deployment process.
- Developed academic management features to support the school's administrative activities.

Education Level

Universitas Atma Jaya Yogyakarta - Jl. Babarsari No.43, Janti, Caturtunggal, Kec. Depok, Kabupaten Sleman, Daerah Istimewa Yogyakarta 55281

Jul 2022 - Jul 2026

Bachelor of Informatics, 3.84/4.00

- Honors: Cum Laude
- Final Project: E-Commerce Performance Research — Developed an e-commerce application to compare REST API and tRPC performance using Next.js, Express.js, and tRPC. Conducted load testing with k6 and evaluated response time, P95/ P99, throughput, error rate, CPU, and RAM usage.

Organisational Experience

Kelompok Studi Pemrograman UAJY (KSP UAJY) - Yogyakarta, Indonesia

Aug 2023 - Jun 2024

Member & Event Committee

Student organization focused on programming, algorithms, and software development at Universitas Atma Jaya Yogyakarta.

- Participated in Programming in Contest 2023 as a competitor and contributed as a committee member in 2024.
- Contributed to various KSP events, including the 2023 field trip and programming workshops.
- Supported the “Mastering Git & GitHub: Boundless Code Collaboration” workshop organized by KSP and KSL.
- Guided new members in learning programming fundamentals, algorithms, and basic software development through lessons and exercises.

Skills, Project & Achievements

- **Projects** 📍 (2026): SIAKAD Development — Practical Work Project
- **Projects** 📍 (2026): E-Commerce Performance Research
- **Soft Skills:** Analytical Thinking, Critical Thinking, Problem Solving, Teamwork, Project Management
- **Certification** 📍 (2024): British English Council CEFR C1 Advanced
- **Hard Skills** : TypeScript, JavaScript, SQL, Python, C, HTML, CSS, Next.js, React, Node.js, Express.js, tRPC, Prisma, PostgreSQL, MySQL, Redis, Git, GitHub, Docker, Postman, Bruno, Jupyter Notebook, k6, AWS Lightsail, Docker.
