Klaci II, RT.001/RW.010, Klaci III, Margoluwih, Kec. Seyegan, Kabupaten Sleman, Daerah Istimewa Yogyakarta 55561

A fresh graduate in Informatics from Universitas Atma Jaya Yogyakarta, where I studied Software Development Engineering. Most recent experience has been in web development, including building full-stack applications, backend APIs, and working with system performance. Mainly worked with TypeScript, Next.js, Node.js, Express.js, Prisma, and SQL databases, as well as deploying applications on AWS Lightsail. Particularly interested in software engineering, especially backend development, APIs, and system performance, with an openness to learning new technologies and adapting to different tools when required by a project or role. Besides the main stack, also explored Python and Go while maintaining a working familiarity with Java, with a willingness to learn whatever is needed and put in the work to get there.

Work Experiences

STT Diakonos - Pajerukan, Kaliori, Kalibagor, Banyumas
Regency, Central Java (Hybrid)

Jan 2026 - Mar 2026

SIAKAD Development — Practical Work Project

STT Diakonos Banyumas is a theological higher education institution established in 2002 to provide Christian and theological education in the Banyumas region, and the project involved developing a web-based Academic Information System (SIKAD) to manage academic and administrative processes such as KRS, grades, attendance, and payments for students, lecturers, admin, and finance staff.

- Developed and delivered a web-based Academic Information System (SIKAD) for STT Diakonos Banyumas.
- Developed academic management features covering KRS, grades, attendance, and payments for students, lecturers, admin, and finance staff.
- Handed over the completed system and provided technical support during the deployment process.

Education Level

Universitas Atma Jaya Yogyakarta  - Jl. Babarsari No.43, Janti, Caturtunggal,
Kec. Depok, Kabupaten Sleman, Daerah Istimewa Yogyakarta 55281

Jul 2022 - Jul 2026

Bachelor of Informatics, 3.84/4.00

- Honors: Cum Laude
- Final Project: E- Commerce Performance Research. Developed an e-commerce application to compare REST API and tRPC performance using Next.js and Express.js. Conducted load testing with k6 and evaluated response time, P95/ P99 latency, throughput, error rate, CPU, and RAM usage.

Organisational Experience

Kelompok Studi Pemrograman UAJO (KSP UAJO) - Yogyakarta, Indonesia

Aug 2023 - Jun 2024

Member & Event Committee

Student organization focused on programming, algorithms, and software development at Universitas Atma Jaya Yogyakarta.

- Participated in Programming in Contest 2023 as a competitor and contributed as a committee member in 2024.
- Contributed to various KSP events, including the 2023 field trip and programming workshops.
- Supported the “Mastering Git & GitHub: Boundless Code Collaboration” workshop organized by KSP and KSL.
- Guided new members in learning programming fundamentals, algorithms, and basic software development through lessons and

exercises.

Skills, Project & Achievements

- **Projects** 📌 (2026): SIAKAD Development — Practical Work Project
- **Projects** 📌 (2026): E-Commerce Performance Research
- **Soft Skills**: Analytical Thinking, Critical Thinking, Problem Solving, Teamwork, Project Management
- **Certification** 📌 (2024): British English Council CEFR C1 Advanced
- **Hard Skills**: TypeScript, JavaScript, SQL, Python, C, HTML, CSS, Next.js, React, Node.js, Express.js, tRPC, Prisma, PostgreSQL, MySQL, Redis, Git, GitHub, Docker, Postman, Bruno, Jupyter Notebook, k6, AWS Lightsail, Docker.
